

## Tender & Contract Disclosure Information

### Procurement Details

TIDC has engaged the services of a highly experienced Technical Manager to coordinate the design activities of various Technical Managers on the Clearways Liverpool Project.

Over the past 4 months TIDC has carried out an extensive search of the industry in an attempt to engage suitable personnel for the Commuter Car Parks Program. This search has shown there are very few suitable applicants available. Given this recognised shortage of resources in this critical area, a proposal for a Technical manager for the Liverpool Project was sought from one of the 17 firms approached for the Commuter Car Parks Program.

A highly-experienced Technical Manager with significant rail design, construction and project management experience was available for immediate start. The rates are market competitive. Therefore, consistent with TIDC policy and procedures, approval was sought on this occasion to negotiate a direct engagement.
