

Tender & Contract Disclosure Information

Tender Details

TIDC engaged specialist consultants with detailed knowledge of rail systems and equipment, and unique project knowledge and experience, to manage the Central Defects System and provide 24/7 defects management coverage on the Epping to Chatswood Rail Link (ECRL) Project.

These consultants are uniquely experienced and their rates are market competitive. Retaining those personnel with intimate project knowledge, particularly of non-standard equipment, is both cost-effective and ensures that defects can be managed and rectified promptly, so that train operations are not impacted. TIDC values the experience of these consultants and the ability to pass it on to TIDC personnel.

Consistent with TIDC policy and procedures, approval was sought to negotiate a direct engagement.
